Derma-San is an instant, no-rinse hand sanitizer. It is a patented moisturizing and conditioning formulation, which is based on the antimicrobial ingredient benzalkonium chloride. Derma-San kills 99.9% to 99.9999% of most common germs that may cause illness in just 15 seconds. Microorganisms on the hands can be transferred to food-contact surfaces and cause foodborne illness.

Benzalkonium chloride-based hand sanitizers exhibit up to 2 - 4 hours residual antibacterial protection (unlike alcohol-based hand sanitizers). Derma-San is recommended for repeated use since it maintains its antibacterial efficacy (due to lack of irritation and residual effect, unlike alcohol-based products).

Use of Derma-San will help comply with HACCP guidelines. Anderson Chemical Company certifies that this product is acceptable for use as a hand sanitizing compound (USDA E3).

Available in 4/1 gallon cases.  
Item No. ADP0006.
