ANTROL CIP CHEMICAL CONTROL UNIT

The “ANTROL CIP CHEMICAL CONTROL UNIT” is a wall mounted panel for the purpose of dispensing and monitoring cleaning and sanitizing products into **Clean-In-Place** Systems. **Anderson** will assist you with your specific design and implementation needs.

- ▶ Provides flexibility in dispensing, based on conductivity, timed or push button feed methods.
- ▶ Has the ability to operate 20 air-operate pumps with accuracy and repeatability.

FEATURES & BENEFITS

- ▶ Colored push button panels represent the products being used through the system matching industrial standards.
- ▶ Signet Technology is used for specific control of conductivity/pH/ORP
- ▶ Air-Operated Double Diaphragm pumps used for dependable product delivery.
 - Polypro available when using non-oxidizing products
 - Kynar/FEP used for specific product applications
- ▶ White Board Mounting provides a clean and sanitary appearance, while providing a maintenance free environment.
- ▶ Air operated solenoid injection point.
- ▶ Pick up systems include ID Tags, foot valves and check valves for the prevention of siphoning, back flow and misreading of drums.
- ▶ Complete installation includes all chemical lines from drum to point of use.
- ▶ Dispensing pumps are ID Tagged for ease of reading and safety.

■ Blue	Alkaline Products
■ Green	Neutral Products
■ Red	Acid Products
■ Yellow	Chlorinated Products
