## PORTABLE FOAMING SYSTEMS

“**PORTABLE FOAMING SYSTEMS**” apply thick, soaking chemical foam, which remains active until rinsed. Call today to find out more about a new generation of cleaning tools that can affordably solve your toughest problems.

- ▶ **FOAM-IT** portable units operate on compressed air. With non-pressurized tank, there is no fear or danger of bursting. Can be easily filled during operation. Require only premix chemical solution to create thick, long lasting foam.
- ▶ Cart and tank combinations meet foam cleaning requirements of most all applications. Foam will dwell on both vertical and horizontal surfaces to react with soil for easy removal. Unlike high pressure sprayers, foam does not force itself into sensitive areas causing equipment malfunction.
- ▶ Will produce up to 50 gallons of foam per minute with 40-80 psi at 5-10 cfm.
- ▶ Ability to spray foam up to 30 feet with most foaming products.

5 Gallon Foam Unit  
FI-5N

10 Gallon Foam Unit  
FI-10N

20 Gallon Foam Unit  
FI-20N

30 Gallon Foam Unit  
FI-30N
