12. ECOLOGICAL INFORMATION

12.1 Toxicity:
NO DATA AVAILABLE.

12.2 Persistence and degradability:
The ultimate decomposition product of this material is CO2, CO & oxides of sulfur. The degradation study at various time interval is not available. However, we can conclude as follows: The referred product is sodium salt and hence is very stable under normal conditions of temp. The product does not decompose over the years, so for 12 months it does not decompose. Under extreme conditions of very high temperatures, it would decompose initially to pyrene and sulfuric acid and thereafter to CO2, CO and sulfur oxides.
