#### **1** Identification

- · Product identifier
- · Trade name: Pure3000
- · Article number: 88341-4
- · Recommended use and restriction on use
- · Recommended use: Disinfectant
- Restrictions on use: Contact manufacturer.
- · Details of the supplier of the Safety Data Sheet
- Manufacturer/Supplier: Pureline Treatment Systems, LLC 1241 N. Ellis Street Bensenville, IL 60106 (847) 963-8465 INFO@PURELINE.COM
- Emergency telephone number: ChemTel Inc. (800)255-3924, +1 (813)248-0585

#### 2 Hazard(s) identification

#### · Classification of the substance or mixture

```
GHS05 Corrosion
```

Met. Corr.1 H290 May be corrosive to metals.

Eye Irrit. 2A H319 Causes serious eye irritation.

#### · Additional information:

There are no other hazards not otherwise classified that have been identified.

0 percent of the mixture consists of ingredient(s) of unknown toxicity.

#### · Label elements

#### · GHS label elements

The product is classified and labeled according to the Globally Harmonized System (GHS). • Hazard pictograms

## · Signal word Warning

- · Hazard statements
- H290 May be corrosive to metals.
- H319 Causes serious eye irritation.
- · Precautionary statements
- P264 Wash thoroughly after handling.

Description of first aid measures	
General information:	
Take affected persons out into the fresh air.	
Immediately remove any clothing soiled by the proc	duct.
After inhalation:	
Supply fresh air; consult doctor in case of complain	
In case of irregular breathing or respiratory arrest p	
Provide oxygen treatment if affected person has dif	ficulty breathing.
After skin contact:	
Immediately rinse with water.	
If skin irritation is experienced, consult a doctor.	
After eye contact:	
Protect unharmed eye.	
Remove contact lenses if worn, if possible.	
Rinse opened eye for several minutes under runnin	ng water. If symptoms persist, consult a doctor.
After swallowing:	
Rinse out mouth and then drink plenty of water.	
Do not induce vomiting; immediately call for medica	al help.
Information for doctor:	
Most important symptoms and effects, both acu	ite and delayed
Breathing difficulty	
Coughing	
Irritant to eyes.	
Nausea in case of ingestion.	
Gastric or intestinal disorders when ingested.	
Danger	
Danger of impaired breathing.	
May cause respiratory irritation.	
Indication of any immediate medical attention a	nd special treatment needed
No further relevant information available.	
Fire-fighting measures	

- Suitable extinguishing agents: The product is not flammable. Use fire fighting measures that suit the environment.
  For safety reasons unsuitable extinguishing agents: None.
  Special hazards arising from the substance or mixture Formation of toxic gases is possible during heating or in case of fire.
- · Advice for firefighters
- · Protective equipment:

Wear self-contained respiratory protective device.

Wear fully protective suit.

#### 6 Accidental release measures

· Personal precautions, protective equipment and emergency procedures Ensure adequate ventilation. Wear protective equipment. Keep unprotected persons away. For large spills, use respiratory protective device against the effects of fumes/dust/aerosol.

- · Environmental precautions: Avoid release to the environment.
- Methods and material for containment and cleaning up:

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Do not allow to dry out

Dispose contaminated material as waste according to item 13.

Send for recovery or disposal in suitable receptacles.

Reference to other sections See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

#### 7 Handling and storage

· Handling: · Precautions for safe handling Use only in well ventilated areas. Prevent formation of aerosols. Protect from sunlight. Do not expose to temperatures exceeding 122 °F (50 °C). · Information about protection against explosions and fires: No special measures required. · Conditions for safe storage, including any incompatibilities

- · Storage:
- · Requirements to be met by storerooms and receptacles: Store in a cool location. Store only in the original receptacle. Provide ventilation for receptacles. · Information about storage in one common storage facility: Store away from foodstuffs. Store away from reducing agents. Do not store together with acids. Do not store together with alkalis (caustic solutions). · Further information about storage conditions:

Prevent from drying out.

Photoreactive.

- Keep receptacle tightly sealed.
- · Specific end use(s) No further relevant information available.

#### PVC gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

- · Not suitable are gloves made of the following materials: PVA gloves
- · Eye protection:

Safety glasses

- · Body protection: Protective work clothing
- · Limitation and supervision of exposure into the environment Avoid release to the environment.
- Risk management measures See Section 7 for additional information.

#### 10 Stability and reactivity

- · Reactivity
- · Chemical stability
- Thermal decomposition / conditions to be avoided: Photoreactive. Keep away from heat and direct sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.
  Possibility of hazardous reactions Reacts with reducing agents. Contact with acids releases toxic gases. Toxic fumes may be released if heated above the decomposition point. Reacts with peroxides and other radical forming substances.
- · Conditions to avoid Avoid acids.
- · Incompatible materials: No further relevant information available.
- Hazardous decomposition products:
- Chlorine
- Chlorine compounds

## **11 Toxicological information**

- · Information on toxicological effects
- · Acute toxicity:
- · LD/LC50 values that are relevant for classification: None.
- · Primary irritant effect:
- on the skin: Slight irritant effect on skin and mucous membranes.
- · on the eye: Irritating effect.
- · Sensitization: No sensitizing effects known.
- · Subacute to chronic toxicity: No further relevant information available.
- Additional toxicological information: Irritant
- May cause respiratory irritation.

#### • Acute effects (acute toxicity, irritation and corrosivity): Irritating to eyes.

Inhalation may cause irritation to the respiratory system.

May cause gastro-intestinal irritation if ingested.

• Repeated Dose Toxicity: No further relevant information available.

## **12 Ecological information**

- · Toxicity
- · Aquatic toxicity: The material is harmful to the environment.
- Persistence and degradability No further relevant information available.
- · Behavior in environmental systems:
- · Bioaccumulative potential No further relevant information available.
- Mobility in soil No further relevant information available.
- · Ecotoxical effects:
- · Remark:

Toxic for fish

Toxic for water fleas

- · Additional ecological information:
- · General notes:

Do not allow product to reach ground water, water course or sewage system.

Danger to drinking water if even small quantities leak into the ground.

· Other adverse effects No further relevant information available.

#### **13 Disposal considerations**

#### · Waste treatment methods

· Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach sewage system. Can be disposed of with household garbage with prior chemical-physical or biological treatment following consultation with the waste disposal facility operator and the pertinent authorities and adhering to the necessary technical regulations.

(Contd. of page 10) non-pesticide chemicals. Following is the hazard information as required on the pesticide label: KEEP OUT OF REACH OF CHILDREN DANGER **FIRST AID** IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 15 minutes. Call a poison control center or doctor immediately for treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with lpenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice if burning or irritation of the skin persists. IF SWALLOWED: Have person drink a glass of water immediately if able to swallow. Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. IF INHALED: Move person to fresh air and monitor for respiratory distress. If cough or difficulty in breathing develops, consult a physician immediately. If person is not breathing, call 911 or an ambulance, then give artificial respiration. Call a poison control center or doctor for further treatment advice. STORAGE AND DISPOSAL STORAGE: Do not contaminate water, food, or feed by storage or disposal. Keep product in tightly closed container when not in use. Don't drop, roll, or skid drum. Keep upright. Always replace cover. Store in a cool, dry well-ventilated area away from heat or open flame. EMERGENCY HANDLING: In case of contaminatino or decomposition, do not reseal container. If possible, isolate container in open and well ventilated area. Flood with large volumes of water. If fire occurs, extinguish fire by applying large quantities of water. Any unopened drums near the fire should be cooled by spraying with water. PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance. CONTAINER DISPOSAL: Refillable Container. Refill this container with Pure3000 only. Do not reuse this container for any other purpose. Cleaning or pressure rinsing the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or a mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing process two more times. To pressure rinse the container before final disposal, empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds, after the flow begins to drip. · IARC (International Agency for Research on Cancer)
