### 4. FIRST AID MEASURES

In case of unintended overexposure, the following measures apply

**Inhalation**
- **Effects**: May cause allergic respiratory reaction
- **Symptoms**: Shortness of breath, wheezing and coughing
- **First Aid**: Remove person to fresh air. If signs/symptoms continue, get medical attention and show this safety data sheet to the doctor in attendance.

**Skin Contact**
- **Effects**: May cause slight irritation.
- **Symptoms**: Slight irritation.
- **First Aid**: Remove and wash contaminated clothing before re-use. Wash off immediately with plenty of water. If symptoms persist, call a doctor. Show this safety data sheet to the doctor in attendance.

**Eye Contact**
- **Effects**: May cause slight irritation.
- **Symptoms**: Slight irritation.
- **First Aid**: Hold eye open and rinse slowly and gently with water for 15-20 min. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. If symptoms persist, call a doctor. Show this safety data sheet to the doctor in attendance.

**Ingestion**

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions
For personal protection see section 8

Environmental Precautions
Collect spillage.

Methods for cleaning up
Avoid formation of dust and aerosols
Spilled preparation should be removed immediately to avoid formation of dust from dried preparation. Take up by mechanical means preferably by a vacuum cleaner equipped with a HEPA (High Efficiency Particulate Air) filter. Flush remainder carefully with plenty of water. Avoid splashing, high pressure washing or compressed air cleaning to avoid formation of aerosols. Ensure sufficient ventilation. Wash contaminated clothing.

For personal protection see section 8

7. HANDLING AND STORAGE

Handling
Avoid formation of dust and aerosols
Ensure adequate ventilation
Liquid enzyme preparations are dust-free preparations. However, inappropriate handling may cause formation of dust or aerosols.

Storage
Keep tightly closed in a dry and cool place. Temperature 0-25 °C (32-77 °F)

Derived Minimal Effect Level (DMEL)

Occupational exposure controls

Engineering Controls
Ensure adequate ventilation, especially in confined areas
Maintain good conditions of industrial hygiene. Some processes may require enclosures, local exhaust ventilation, or other engineering controls to control airborne levels. Additional handling and healthy/safety information is available upon request

Personal Protective Equipment

Respiratory Protection
In case of insufficient ventilation wear suitable respiratory equipment that meets HEPA/P100 specifications

Eye Protection
Safety glasses with side-shields
