DERMA-SAN NO-RINSE HAND SANITIZER

Derma-San is an instant, no-rinse hand sanitizer. It is a patented moisturizing and conditioning formulation, which is based on the antimicrobial ingredient benzalkonium chloride. **Derma-San** kills 99.9% to 99.9999% of most common germs that may cause illness in just 15 seconds. Microorganism on the hands can be transferred to food-contact surfaces and cause foodborne illness.

Benzalkonium chloride-based hand sanitizers exhibit up to 2 - 4 hours residual antibacterial protection (unlike alcohol-based hand sanitizers). **Derma-San** is recommended for repeated use since it maintains its antibacterial efficacy (due to lack of irritation and residual effect, unlike alcohol-based products).

Use of **Derma-San** will help comply with HACCP guidelines. **Anderson Chemical Company** certifies that this product is acceptable for use as a hand sanitizing compound (USDA E3).

*Available in 4/1 gallon cases.
Item No. ADP0006.*
