

# **Safety Data Sheet**

Revision Date 2022-10-08 Version 1

# 1. Identification of the substance/preparation and of the company/undertaking

Product Name Saber UN/ID No. UN1824 Synonyms None

### Recommended use of the chemical and restrictions on use

Recommended Use Dishmachine detergent Uses advised against No information available

**Supplier Address** 

Anderson Chemical Company, 325 South Davis Avenue, Litchfield, MN 55355 (320-693-2477)

Emergency telephone number

Chemtrec 1-800-424-9300

### 2. Hazards identification

### Classification

**OSHA Regulatory Status** 

Skin Corrosion/Irritation Category 1 Sub-category B

Serious Eye Damage/Irritation Category 1
Corrosive to Metals Category 1

# **Label Elements**

Signal word: Danger

#### **Hazard Statements**

Causes severe skin burns and eye damage.

May be corrosive to metals.

**Precautionary Statements - Prevention** 

Do not breathe dust/fume/gas/mist/vapors/spray. Wash face, hands and any exposed skin thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection. Keep only in original container.

**Precautionary Statements - Response** 

Immediately call a POISON CENTER or doctor/physician. Specific treatment (see Section 4 on the SDS). IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. IF INHALED: Remove victim to fresh air and keep comfortable for breathing. IF SWALLOWED: Rinse mouth. DO NOT induce vomiting. Absorb spillage to prevent material damage.

#### **Precautionary Statements - Storage**

Store locked up.

Store in a corrosive resistant container.

### **Precautionary Statements - Disposal**

Dispose of contents/container to an approved waste disposal plant.

Hazards not otherwise classified (HNOC)

Other Information

# 3. Composition/information on ingredients

Chemical Name	CAS Number	% by Weight
Sodium Hydroxide	1310-73-2	15 - 16

<sup>\*</sup>The exact percentage (concentration) of composition has been withheld as a trade secret.

#### 4. First aid measures

### General advice

Get immediate medical attention.

#### Eve contact

Flush immediately with water for 15 minutes. Lift upper and lower eyelids for complete rinsing.

#### Skin Contac

Flush with water for 15 minutes. Remove contaminated clothing and wash before reuse. Inhalation

#### Inhalation

Remove to fresh air. Administer oxygen if breathing is difficult. If breathing has stopped, give artificial respiration.

#### Ingestior

Rinse mouth with water. Give water to dilute. Do not induce vomiting. Never give anything by mouth to a semi-comatose, comatose, convulsing or unconscious person.

#### Self-protection of the first aider

Use personal protective equipment as required. Avoid contact with skin, eyes or clothing.

### Most important symptoms and effects, both acute and delayed

#### Symptoms

Inhalation of mists can cause severe respiratory irritation. Symptoms may include coughing, choking and wheezing. Direct skin contact may cause corrosive skin burns, deep ulcerations and possibly permanent scarring. Corrosive to the eyes and may cause severe damage including blindness. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause severe irritation and corrosive damage in the mouth, throat and stomach. Symptoms may include abdominal pain, vomiting, burns.

### Indication of any immediate medical attention and special treatment needed

#### Note to physicians

Treat symptomatically.

# 5. Fire-fighting measures

#### Suitable extinguishing media

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

#### Unsuitable extinguishing media

None known

#### Specific hazards arising from the chemical

Contact with most metals will generate flammable hydrogen gas. Contact with water will generate considerable heat.

#### Hazardous combustion products

Toxic fumes of sodium oxide.

#### **Explosion Data**

Sensitivity to mechanical impact None Sensitivity to static discharge None

### Protective equipment and precautions for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear. Use water spray to cool fire exposed containers. Move containers from fire area if you can do it without risk.

### 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

#### Personal precautions

Evacuate nonessential personnel. Ventilate area. Wear appropriate personal protection equipment.

#### **Environmental precautions**

See Section 12 for additional ecological information. Prevent from entering into soil, ditches, sewers, waterways and/or groundwater.

#### Methods for containment

Completely contain spilled material with dikes or sand bags, etc. Use water spray to cool fire exposed containers. Move containers from fire area if you can do it without risk.

#### Methods for cleaning up

Recover as much material as possible into containers for disposal or reuse. Remaining material may be diluted with water and neutralized. Flush spill area with water. Neutralization products, both solid and liquid, must be recovered for disposal.

# 7. Handling and storage

### Precautions for safe handling

#### Advice on safe handling

Do not get in eyes, on skin, or clothing. Do not breathe vapors or mists. Do not ingest. Wash thoroughly after handling. Wear protective clothing/equipment. Use with adequate ventilation.

### Conditions for safe storage, including any incompatibilities

#### Storage Conditions

Keep containers tightly closed and properly labeled. Store in a cool, dry, well-ventilated area, away from incompatible materials. Wash hands before eating, drinking, using tobacco, applying make-up or using the toilet. Do not store, use, and/or consume foods, beverages, tobacco in areas where this product is stored. Keep away from heat, sparks, flame and other sources of ignition (i.e., pilot lights, electric motors and static electricity).

#### Incompatible materials

Oxidizing agent. Acids. Bases. Water. Organic material. Reducing sugars. Metals. (Aluminum, magnesium, zinc, copper, lead, tin and their alloys). Halogenated compounds.

# 8. Exposure controls/personal protection

### **Control parameters**

### **Exposure Guideline**

Chemical Name	ACGIH TLV	OSHA PEL	NIOSH IDLH
Sodium Hydroxide 1310-73-2	Ceiling: 2 mg/m 3	TWA: 2 mg/m 3 (vacated) Ceiling: 2 mg/m 3	IDLH: 10 mg/m 3 Ceiling: 2 mg/m 3

### Appropriate engineering controls

Showers

Eyewash stations Ventilation systems

### Individual protection measures, such as personal protective equipment

#### Eye/face protection

Eye protection is recommended.

#### Skin and body protection

No special technical protective measures are necessary.

#### Respiratory protection

If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations.

### **General Hygiene Considerations**

Wash contaminated clothing before reuse.

### 9. Physical and chemical properties

### Information on basic physical and chemical properties

# 10. Stability and reactivity

#### Reactivity

Concentrated solutions react violently with water, generating considerable heat. Contact with metals may evolve flammable hydrogen gas.

#### Chemical stability

Stable under recommended storage conditions.

#### Possibility of Hazardous Reactions

NEVER add water to product. ALWAYS add product, with constant stirring, slowly to surface of water to minimize heat generation and spattering. Mixing with acid or incompatible materials may cause splattering and release of large amounts of heat. Will react with some metals forming flammable hydrogen gas. Carbon monoxide gas may form upon contact with reducing sugars or food and beverage products in enclosed spaces.

#### Conditions to avoid

Toxic fumes of sodium oxide.

#### Incompatible materials

Oxidizing agent. Acids. Bases. Water. Organic material. Reducing sugars. Metals. (Aluminum, magnesium, zinc, copper, lead, tin and their alloys). Halogenated compounds.

#### **Hazardous Decomposition Products**

# 11. Toxicological information

### Information on likely routes of exposure

Product Information Inhalation

Eye contact

No information available

Inhalation of mists can cause severe respiratory irritation. Symptoms may include coughing, choking and wheezing.

Corrosive to the eyes and may cause severe damage including blindness. Symptoms may include stinging, tearing, redness,

swelling, and blurred vision.

Skin Contact Direct skin contact may cause corrosive skin burns, deep ulcerations and possibly permanent scarring.

**Ingestion** May cause severe irritation and corrosive damage in the mouth, throat and stomach. Symptoms may include abdominal pain,

vomiting, burns.

Chemical Name	Oral LD50	Dermal LD50	Inhalation LC50
Sodium Hydroxide 1310-73-2	-	= 1350 mg/kg ( Rabbit )	-

### Information on toxicological effects

Symptoms See section 4.

### Delayed and immediate effects as well as chronic effects from short and long-term exposure

Sensitization No information available
Germ cell mutagenicity No information available
Carcinogenicity No information available

Chemical Name ACGIH IARC NTP OS	IA
